

ALABI ESTHER OLUWATIMILEHIN

Full-Stack Developer · Web platforms, automations, and AI/data tools · React / Next.js / TypeScript / Python

Ibadan, Nigeria | +234 902 695 6555 | admin@devessie.xyz | github.com/dev-essie | linkedin.com/in/alabi-esther-essie

PROFILE

Full-stack developer who builds web platforms, automations, and AI/data tools for clients and ships them end to end: front end, API, database, deployment. Sole developer of a live MetaTrader 5 licensing platform (licensing API, payments, user accounts), four client websites, a WordPress newsletter plugin on the Resend API, and a Telegram bot that writes structured reports to Google Sheets. A First Class Biochemistry degree (CGPA 4.64/5.00) is where the data side comes from: I built GeneLens, an RNA-seq analysis app with machine learning and AI interpretation, and bring that habit of careful validation to every build.

TECHNICAL SKILLS

Languages: TypeScript, JavaScript, Python, SQL, HTML, CSS

Frontend: React, Next.js, Vite, Tailwind CSS, responsive design, accessibility

Backend & data: Node.js, REST APIs, Supabase, PostgreSQL, authentication and licensing flows, payment integration

CMS & automation: WordPress (custom plugins), Resend, Telegram Bot API, Google Sheets API, n8n

AI & APIs: Anthropic Claude API, OpenAI API, prompt engineering, third-party API integration

Data & ML: pandas, NumPy, SciPy, scikit-learn (Random Forest, Logistic Regression, cross-validation, ROC-AUC), Plotly, Streamlit; statistics and RNA-seq analysis from research work

Tools: Git/GitHub, Vercel, Cloudflare, Streamlit Cloud, VS Code

EXPERIENCE

Freelance Software Developer

Sep 2025 – Present

Client websites and platforms, remote

- **Algo Trading with Ighodalo** (algotradingwithighodalo.xyz): sole developer of a Next.js/TypeScript platform for selling and licensing MetaTrader 5 Expert Advisors. Built the licensing API, payment flow, user accounts, and license validation on Supabase/Postgres. Live and in use by paying traders.
- **MyPropGuard** (mypropguard.io): waitlist landing page for an automated risk-management product for CFD prop traders, built for conversion with a founding-cohort sign-up flow.
- **Gofame 360, MarvelTech Hub, Haven Word Church:** designed, built, and deployed responsive marketing and community websites in React, TypeScript, and Tailwind CSS, handling hosting, updates, and maintenance.
- **Emmanuel Onoja newsletter:** wrote a custom WordPress plugin on the Resend API that confirms subscriptions by email and sends an automated welcome newsletter.
- **Telegram Cell Report Bot:** Python bot that validates structured meeting reports from a 30-member group and saves them to Google Sheets automatically, removing manual data entry.

Software Developer Intern

2025 – Present

Paycrest, decentralised stablecoin-to-fiat settlement protocol (pre-seed fintech)

- Contribute to frontend and full-stack development on a production-grade settlement protocol serving users across Africa.

ICT Department Staff (NYSC), Mercy Medical University

Jun 2025 – May 2026

National Youth Service Corps primary assignment

- Configured, monitored, and maintained computer-based test (CBT) examination systems, ensuring stability, accuracy, and minimal downtime.
- Provided real-time technical support during examinations across hardware, software, and network issues, and handled general IT support for the institution.

Laboratory Intern, Genetics Laboratory

2022 – 2023

University College Hospital (UCH), Ibadan, and SolidCare Diagnostics

- Assisted with PCR, DNA extraction, and diagnostic testing in a clinical research setting, supporting accurate and reliable results.

AI & DATA TOOLS

GeneLens, RNA-seq analysis web app

2025 – Present

genelens.streamlit.app · github.com/dev-essie/GeneLens · Python, Streamlit, scikit-learn, Plotly, Claude API

- Built the whole product: statistics pipeline, pathway enrichment via the Enrichr API, a Random Forest classifier with cross-validation, and AI-written interpretation, behind an interactive Streamlit UI with automatic gene-ID mapping.
- Validated on two public NCBI GEO datasets (60,683 genes × 34 samples, and a Type 2 Diabetes liver set) and used it for an independent published study (github.com/dev-essie/genelens-t2dm-study).

Customer Churn Predictor · Research Paper Assistant

2025 – 2026

Python, scikit-learn, Streamlit, OpenAI API

- Trained and evaluated Random Forest and Logistic Regression churn models (cross-validation, ROC-AUC) and shipped them as a Streamlit app.
- Built a tool that parses academic PDFs and summarises them with the OpenAI API.

EDUCATION

BSc Biochemistry, First Class Honours (CGPA 4.64 / 5.00)

2021 – Oct 2024

University of Medical Sciences (UNIMED), Ondo State, Nigeria

- Dean's List every semester (8 consecutive). Top scores: Toxicology 91%, Advanced Molecular Biology 90%, Organic Chemistry II 89%, Final Year Project 85%.
- Thesis: designed and ran a controlled five-group in vivo study on antioxidant protection in diabetic liver injury, with full statistical analysis ($P < 0.001$).

CERTIFICATIONS

- | | |
|---|--|
| • Front End Development Libraries, freeCodeCamp (300 hrs), Apr 2025 | • Responsive Web Design, freeCodeCamp (300 hrs), Feb 2025 |
| • JavaScript Algorithms and Data Structures, freeCodeCamp (300 hrs), Mar 2025 | • Complete WordPress Website Developer Course, Udemy, Sep 2024 |

LEADERSHIP & AWARDS

- Assistant Platoon Leader, NYSC Orientation Camp (Jun 2025): coordinated welfare and logistics for about 200 corps members; 3rd place, camp debate competition.
- Usher Team Leader, church leadership (2024 – 2025): scheduled, trained, and coordinated a volunteer team. WAEC and NECO examination checker: result processing and verification.
